GANTRY PILE FOLDING

High-Speed Gantry Pile Folding Machine is mainly used for medium to large circulations as well as for large formats. The sheets on the pallet to be folded are run into the feeder by means of a pallet truck directly from the printing press with no manual intervention. In all, the gantry pallet feeder provides high production capacity with shortest interruptions for feeding by pallets. More precisely, you can transport the entire printed pallet from the delivery of the printing press into the feeder of the folder.
