PHARMA INSERT & OUTSERT FOLDING MACHINE

Pharma Insert and Outsert Production machine is designed for the production of inserts, outserts, PI's and miniature literature in the pharmaceutical, electronics, cosmetics, food, agricultural and similar industries. Buckle folding machine with the capable of automatically setting the buckle plate and fold roller settings for up to 24 plates in the market. The final fold size requirements can range down to 1.12" x 1.12". Outsert type products usually use an adhesive closure method, or a tab closure method. It offers pharma outsert production systems to produce products ranging from 12 to 350 panels.

Parameter	Specification
Max Sheet Size	520 × 1000 mm
Min Sheet Size	50 × 90 mm
Max Folded Thickness	15 mm
Min Folding Finished Size	30 × 30 mm
Max Folding Finished Size	140 × 90 mm
Sheet Thickness	35 – 200 gsm
Fastest Speed	220 m/min
Power	7.0 kW
Weight	1200 kg
Dimensions	3700 × 8000 mm
