SEMI AUTOMATIC HARDCOVER BOOK CASE CORNER ROUNDING MACHINE

The Semi Auto Hardcover Book Case Corner Rounding Machine is designed to transform straight-corner hardcover cases into smooth rounded corners using different radius moulds as required. It does not require any change to the front-end case making process. With forming and heating functions, it ensures excellent corner finishing.

Parameter	Specification
Speed	20 – 30 pcs/min
Min Case Width	140 mm
Max Case Width	500 mm
Board Thickness	1 – 5 mm
Applicable Rounding Mold Radius	R4 / R6 / R8 / R10 / R12
Voltage	220 V / 50 Hz
Rated Power	200 W
Machine Dimensions (L×W×H)	1350 × 1050 × 1500 mm
Air Demand	0.5 – 0.6 MPa
Weight	190 kg
