STACKERS

Vertical Press Stacker Delivery

Vertical Press Stacker Delivery is a delivery system with a high storage capacity for folded signatures that is therefore particularly suitable for the processing of medium to large runs. Even multiple-ups and delicate papers can be processed with ease. The integrated pressing unit increases the folding quality and the height-adjustable infeed makes the delivery combinable with all folding machines.

Parameter	Specification
Max Sheet Size	400×310B mm
Min Sheet Size	135×85 mm
Power Consumption	0.95 kW
Dimensions	1.66×0.9×1.45 m
Weight	500 kg
